

Quarterly Report on Rhode Island Traffic Stop Data for October, November and December 2004

Executive Summary

March 20, 2005

Prepared by:

Dr. Amy Farrell, Northeastern University, Institute on Race and Justice
Associate Dean, Jack McDevitt, Northeastern University, College of Criminal Justice
Jason Rydberg, Institute on Race and Justice
Chris Eggiman, Institute on Race and Justice

The data presented herein represent monthly statistics of traffic stops and searches by driver's race for each Rhode Island jurisdiction between October 1, 2004 and December 31, 2004. It is important to remember that this data is preliminary and has not yet been compared to an appropriate benchmark, against which we could begin to understand if racial disparity exists in traffic stops. Future analysis will begin to assess the validity of different comparison populations to best approximate the demographic composition of roadways in particular jurisdictions.

Between October 1, 2004 and December 31, 2004, 64,467 traffic stop data cards from 38 municipal jurisdictions and the Rhode Island State Police were recorded. Of the cards submitted 63,372 were used for the calculations seen in Table 1 (complete race and month information) and 60,274 were used for the calculations seen in Table 2 (complete race, month and search information) and 57,759 were used for the calculations in Table 3 (complete race, month and frisk information). This represents roughly a 10% error rate for traffic stop forms missing necessary data.

Although the data contained in this report continue to be preliminary, there are a number of findings that are worth note.

- White drivers make up approximately 82% of those stopped, Black drivers make up nearly 7.5% of those stopped, Hispanic drivers make up 8% of those stopped and Native American, Asian and other drivers comprise the remaining 2.5% of those stopped. Note: Stops include motor vehicle stops, investigation stops and motorist assists.
- Approximately 3% of vehicle stops resulted in a search of the driver, passengers, or the vehicle in the last three months of 2004.
- Once stopped, Black and Hispanic drivers were disproportionately more likely to experience searches than White, Asian, or Native American drivers. Statewide, during this quarter 7.0% of Black and 6.2% of Hispanic drivers were searched compared to

only 2.9% of White drivers (Table 2). It is important to note that all searches incident to a lawful arrest were not considered to be discretionary and therefore were **not included** in this analysis. Discretionary searches include searches based on probable cause, reasonable suspicion, inventory/tow, terry-frisks, plain view or odor of drugs/alcohol.

- Once stopped, Black and Hispanic drivers were also disproportionately more likely to experience frisks than White, Asian, or Native American drivers. Statewide, during this quarter 7.3% of Black and 6.1% of Hispanic drivers were searched compared to only 2.7% of White drivers (Table 3). It is important to note that all searches incident to a lawful arrest were not considered to be discretionary and therefore were **not included** in this analysis.
- The possession of contraband does not appear to fully explain the racial disparities in searches between Black, Hispanic and White drivers. When searched, approximately 27% of White drivers who are searched are found with contraband compared to 30% of Black drivers, and 23.5% of Hispanic drivers (Table 4). As with the previous two tables, searches incident to a lawful arrest were not considered to be discretionary and therefore were **not included** in this analysis.

Quarterly Report on Rhode Island Traffic Stop Data October, November and December 2004

March 20, 2005

A Brief Guide to Interpreting the Traffic Stop Data for the October, November and December 2004 Quarterly Report

The following reports contain information generated by traffic stop statistics collected during the months of October, November and December 2004. The following description, using data from the month of October, is intended to assist the reader by demonstrating how information may be extracted from this report. The data from which the following description is derived appears in this Quarterly Report on the page entitled, "Full State Data."

- In the month of October 2004, a total of 19,519 traffic stop statistics cards were analyzed, representing the total number of motorists stopped by Rhode Island police officers that were recorded with sufficient information to conduct analysis.
- Of this total, 15,900 motorists were white, representing 81.5% of the total stopped (Table 1).
- Of the total white motorists who were stopped¹ 2.6% (397) were searched (excluding searches conducted following a lawful arrest) (Table 2).
- Of the total white motorists who were stopped 2.6% (368) were frisked (excluding frisks conducted following a lawful arrest) (Table 3).
- Of the 444 white motorists who were either searched or frisked (excluding searches or frisks incident to arrest) in October 2004, 29.5% (131) were found with contraband and 70.5% (313) were not found with any contraband. (Table 4.)

¹ In some instances analysis could not be conducted on stops because information on the search, frisk or the outcome of a search and frisk was missing. Such missing data explains why the total number of cases analyzed is not identical across all four tables.

QUARTERLY REPORT TABLES: ALL STATE JURISDICTIONS

1. All Stops By Race

Race	N	October	November	December	Total
White	N	15,900	18,250	17,876	52,026
	%	81.5%	81.8%	81.8%	81.7%
